THE HOLLYWOOD PROFESSIONAL SCHOOL

is an accredited college preparatory school, which was established for the purpose of offering a strong academic foundation to professional students actively engaged in motion picture or radio work. The large enrollment of non-professional students and those studying intensively in some branch of the cultural arts, attests the adaptability of the program. The school's educational ideal may be briefly expressed as the desire to give training and advice which will enable the student to achieve his highest potentialities.

Significant among the many contributing factors to the realization of this objective, is the guidance program. Each student's course of study is planned according to his interests, talents, and objectives. By developing those qualities and skills which will enable him to find gainful employment and to become a desirable member of his community, he is prepared for economic independence. Aesthetic and cultural subjects are considered essential as preparation for leisure time. As a result of this integrating program and personalized instruction, graduates have been able, not only to bring credit to themselves and to the school, but to "keep pace with an ever-changing world."
